

Inspection Management Services

Extensive inspection management services for all types of industries

Applus RTD has extensive inspection management experience and is currently undertaking projects for major clients throughout Australia.

Services include:

- ⊕ Development of inspection strategies, manuals and procedures
- ⊕ Detailed planning and coordination of inspection and condition monitoring activities to manage through-life plant integrity
- ⊕ Planning and coordination of plant shutdown inspection
- ⊕ Maintenance of inspection history
- ⊕ Co-ordination of NDT, corrosion engineering, cathodic protection, procurement inspection and metallurgical examination.

Benefits include:

- ⊕ **Extensive inspection management experience to complement client's own resources.**
- ⊕ **Minimised cost, through outsourcing inspection and maintenance management services.**
- ⊕ **Access to extensive in-service inspection, NDT and engineering resources when needed.**

Through in-house resources, and in collaboration with major international partners, **Applus RTD** has extensive experience of undertaking Inspection Management Services for a diverse range of industries, including:

- ⊕ **Ore Processing and Handling**
- ⊕ **Oil & Gas**
- ⊕ **Petrochemical**
- ⊕ **Refining**
- ⊕ **Power Generation.**
