

Plant Life Management

Provision of consulting and on-site services in plant life management

Applus RTD, with its own in-house resources and through collaboration with major international companies in the field, has extensive experience in the provision of consulting and on-site services in plant life management.

These services have already been used in Australia and throughout the Asia Pacific, helping operators maximize plant availability, minimise forced outages and extend plant life.

These services include:

- ⊕ **Assessment of plant condition and remaining life**
- ⊕ **On-site condition and metallurgical assessment**
- ⊕ **Plant life extension studies**
- ⊕ **On-line condition monitoring**
- ⊕ **Training programmes**
- ⊕ **Capability in refrigerated, ambient and elevated temperature equipment.**

Benefits include:

- ⊕ **Extended intervals between planned outages**
- ⊕ **Reduction in forced outages**
- ⊕ **Increased plant availability**
- ⊕ **Extended plant life**
- ⊕ **Planned component replacement.**

Through in-house resources, and in collaboration with major international partners, **Applus RTD** has extensive experience of undertaking Plant Life Management for a diverse range of industries, including:

- ⊕ **Ore Processing and Handling**
- ⊕ **Oil & Gas**
- ⊕ **Petrochemical**
- ⊕ **Refining**
- ⊕ **Power Generation.**
